

Crytter Cookie Policy

WHAT COOKIES ARE

- Similar to most professional sites, this platform employs cookies—tiny data files saved on your device—to improve your browsing. This section outlines the data they capture, our usage of it, and the reasons we occasionally store these cookies. We'll also guide you on blocking these cookies, noting that this could reduce or impair some site functions.

OUR COOKIE USAGE

- Cookies serve multiple functions, as explained below. Often, there are no standard ways to block cookies without fully deactivating the added features and capabilities on this site. We suggest keeping all cookies active if you're unsure about needing them, especially if they support a service you utilize.

BLOCKING COOKIES

- You can stop cookies from being placed by modifying your browser preferences (consult your browser's Help section for guidance). Note that turning off cookies may impact the operation of this site and others you access. Disabling cookies typically turns off specific functions and elements of the site. Thus, we advise against disabling cookies.

COOKIES WE PLACE

- **Newsletter Subscription Cookies:** Our site provides email or newsletter options, and cookies might recall if you're registered and decide whether to display notifications relevant only to subscribed or unsubscribed visitors.

Form Submission Cookies: When submitting information via forms like contact or feedback pages, cookies could be used to retain your details for upcoming interactions.

Preference Cookies: To deliver an optimal experience, we enable settings for how the site functions during your visit. Cookies are necessary to recall these preferences, allowing recall of the info when you engage with affected pages.

EXTERNAL COOKIES

- Occasionally, we incorporate cookies from reliable external sources. The details below cover potential third-party cookies on this platform.

Analytics Tools: We utilize analytics services to monitor and evaluate site usage, aiding in creating compelling material. These cookies might log details like time spent on pages or visited sections, helping us refine the platform.

EXTERNAL ANALYTICS

- External analytics tools track and assess usage to help us produce engaging material. These cookies may record info such as duration on the site or pages viewed, assisting in platform improvements.

FEATURE TESTING

- Periodically, we evaluate new elements and adjust site delivery methods. During testing, these cookies ensure a uniform experience and help us identify preferred optimizations.

TRANSACTION INSIGHTS

- Since we offer products (like tokens in presales), understanding visitor purchase stats is crucial. These cookies monitor such data, enabling precise business forecasts for overseeing ad and item expenses to secure optimal pricing.

FURTHER DETAILS

- We trust this clarifies matters. As noted, if uncertain about a cookie's necessity, it's generally safer to enable them if they link to used site features.
